STAY STOCKED. STAY SAFE.

A prepared team is a productive team. Help your workforce perform better today and feel better prepared for tomorrow with first aid and safety services from Cintas.

FIRST AID BUILT FOR THE WORKPLACE

Statistics

- There were 2.6 million nonfatal workplace injuries and illnesses reported by private industry employers in 2023.¹
- The total cost of work injuries in 2022 was \$167 billion.²
- A worker died every 99 minutes from a work-related injury in 2023.³
- It has been estimated that employers pay almost \$1 billion per week for direct workers' compensation costs alone.⁴

OSHA 29 CFR 1910.151(B)

"In the absence of an infirmary, clinic, or hospital in near proximity to the workplace which is used for the treatment of all injured employees, a person or persons shall be adequately trained to render first aid. Adequate first aid supplies shall be readily available."

ANSI/ISEA Z308.1-2021

"This standard establishes minimum performance requirements for first aid kits and their supplies that are intended for use in various work environments. Classification of first aid kits, designating the assortment of items and quantity of each item, is based on the complexity of the work environment and level of hazards."

"First aid kits should be inspected at least monthly or following a first aid incident when product is used. Frequent inspection is recommended to ensure the completeness and usable condition of supplies to maintain compliance with this standard. Any supply beyond its marked expiration date should be replaced. Cabinet surfaces should be disinfected regularly, during restocking or following any first aid incident when product is used. Dependent on workplace environment, cabinet surfaces may need to be cleaned and disinfected more frequently. It is recommended that product is easily identified and well organized."

"When assessing risk, proximity of first aid supplies in relation to each worker is imperative. It is inadequate to base first aid kits and cabinets solely on the number of people in a work environment (i.e. 10-Person, 25-Person, 50-Person or 100-Person First Aid Kits)."

PART NUMBER: 180070

The American National Standards Institute (ANSI) released an updated Z308.1 *Minimum Requirements for Workplace First Aid Kits* standard in 2022. In addition to making emergency foil blankets required, emergency tourniquets now have a more specific definition. To learn more about additional guidance in the updated standard, visit [cintas.com/ANSI2021](https://www.cintas.com/ANSI2021).

Our standard first aid kit is stocked with alcohol wipes which are great for cleaning instruments such as scissors.

SAFETY & PPE

When it comes to safety, "good enough" doesn't cut it. From hard hats and hearing protection to safety glasses and gloves, Cintas helps ensure your team has high-quality personal protective equipment — on hand and **ready™** when it's needed most.

SAFETY & PPE SOLUTIONS INCLUDE:

Safety Center® Series.....	48	Head protection	118
Hand protection	50	Cleanup and disposal	126
Eye protection	74	Signage	128
Hearing protection.....	82	Sanitize and disinfect.....	130
Respiratory protection.....	92	Logo program.....	131
Apparel.....	98		
High-visibility apparel	108		

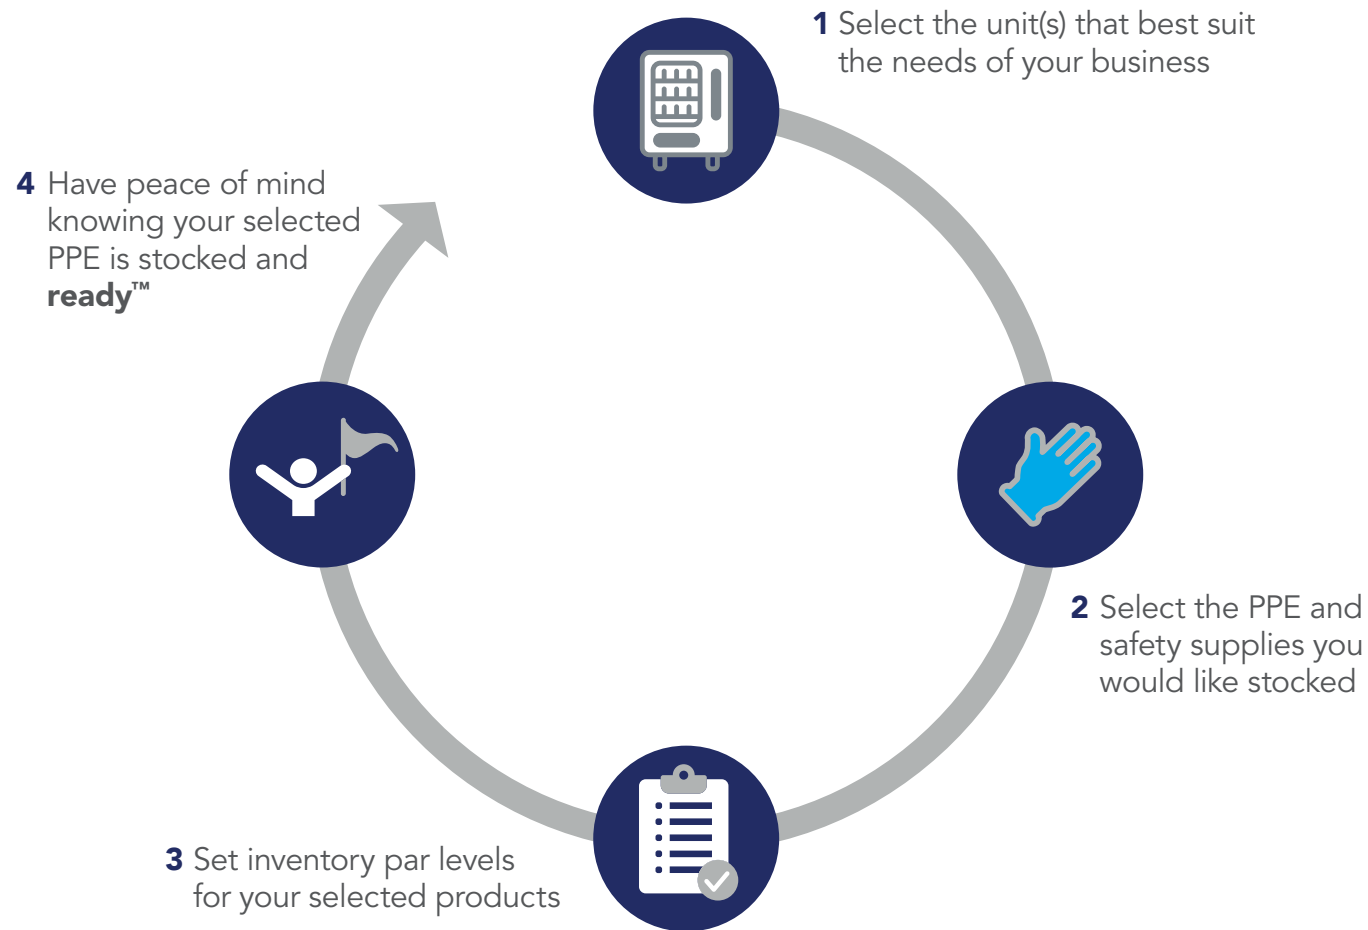

DISCLAIMER: Pursuant to OSHA regulations, 29 CFR 1910.132, an employer bears sole responsibility for selecting the type(s) of personal protective equipment to be used by its employees. All purchasers of personal protective equipment from Cintas bear full responsibility for selecting the PPE appropriate for use by their employees. Cintas makes no representation, warranty, or covenant with respect to the protective qualities of the items or with respect to the fitness or suitability of the items for any particular use or purpose. The purchase of any goods or services from Cintas is subject to Cintas's Standard Terms and Conditions and/or any other applicable written contract executed between the purchaser and Cintas relating to such purchase.

PPE INVENTORY MANAGEMENT

Stay ahead of your PPE needs with routine, on-site service from a dedicated Cintas professional.

HOW THE SERVICE WORKS

Safety products are essential. Cintas has you covered.

Protecting your employees with safety supplies and personal protective equipment (PPE) is a top priority. With the Cintas Safety Center® Series, we will take care of stocking and ordering your selected items for you to have the **Instant Inventory™** you need so you can focus on your business.

THE SAFETY DIRECTOR®

Quality products and great value — that's what you can expect from our private-label brand, The Safety Director®. You will find many products to choose from in nearly every category — just look for the red and blue shield.

BEST SELLER

BEST SELLER

A product line offering of our best-selling safety and PPE products. Stocked locally in our warehouses across the US and brought to you by your trusted Cintas service professional.

DIRECT SHIP

Our Direct Ship products can be shipped only to your designated site and are not eligible for on-site restocking services provided by your Cintas Service Sales Representative. This offers an expanded range of product options that can meet your unique business needs without the need for on-site services.

SAFETY CENTER® SERIES

Personal protective equipment (PPE) is a critical component for any business. With our Safety Center® Series, you get a customized vending solution that makes it easy to control what equipment you get, see what is being used, who is using it — and who isn't.

Six trays, up to 36 selections and an average capacity of 360+ items

Laser technology ensures products are reliably dispensed every time

20 standard compartments with options to tailor and customize

Acrylic window for immediate identification of available items

20-gauge steel, fully welded seams and internal bracing for longevity

Available individually or as a combo

- Coated knit
- Leather
- Welding
- Mechanics
- Fabric
- String knit
- Chemical resistant
- Electrical

DID YOU KNOW?

OSHA 29 CFR 1910.138 (A) STATES:

“General requirements. Employers shall select and require employees to use appropriate hand protection when employees' hands are exposed to hazards such as those from skin absorption of harmful substances; severe cuts or lacerations; severe abrasions; punctures; chemical burns; thermal burns; and harmful temperature extremes.”

OSHA 29 CFR 1910.138 (B) STATES:

“Selection. Employers shall base the selection of the appropriate hand protection on an evaluation of the performance characteristics of the hand protection relative to the task(s) to be performed, conditions present, duration of use and the hazards and potential hazards identified.”

DISCLAIMER: Pursuant to OSHA regulations, 29 CFR 1910.132, an employer bears sole responsibility for selecting the type(s) of personal protective equipment to be used by its employees. All purchasers of personal protective equipment from Cintas bear full responsibility for selecting the PPE appropriate for use by their employees. Cintas makes no representation, warranty, or covenant with respect to the protective qualities of the items or with respect to the fitness or suitability of the items for any particular use or purpose. The purchase of any goods or services from Cintas is subject to Cintas's Standard Terms and Conditions and/or any other applicable written contract executed between the purchaser and Cintas relating to such purchase.

CUT-RESISTANT GLOVES

Cuts and lacerations are among the most common and preventable workplace injuries. Cut-resistant gloves offer rated protection for tasks involving glass, metal, and other sharp materials, making them essential across various work environments such as manufacturing, oil and gas, metalworking, mining and more.

ELECTRICAL GLOVES

Rubber-insulated electrical gloves can help provide protection against shock hazards when employees are working on energized equipment. Leather protectors are worn over them to help prevent punctures.

Some gloves come in letter sizes such as small, medium or large, while others are available in numerical sizes. To determine your numerical glove size, use a tape measure and wrap it around the circumference of the palm of your dominant hand. This measurement in inches is your glove size.

BEST SELLER

NOVAX® RUBBER INSULATED GLOVES

- 11" or 14", unlined, smooth finish

DID YOU KNOW?

OSHA 29 CFR 1910.133 (A) (1) STATES

"The employer shall ensure that each affected employee uses appropriate eye or face protection when exposed to eye or face hazards from flying particles, molten metal, liquid chemicals, acids or caustic liquids, chemical gases or vapors, or potentially injurious light radiation."

OSHA 29 CFR 1910.133 (A) (2) STATES

"The employer shall ensure that each affected employee uses eye protection that provides side protection when there is a hazard from flying objects. Detachable side protectors (e.g. clip-on or slide-on side shields) meeting the pertinent requirements of this section are acceptable."

OSHA 29 CFR 1910.133 (A) (3) STATES

"The employer shall ensure that each affected employee who wears prescription lenses while engaged in operations that involve eye hazards wears

eye protection that incorporates the prescription in its design, or wears eye protection that can be worn over the prescription lenses without disturbing the proper position of the prescription lenses or the protective lenses."

OSHA 29 CFR 1910.133 (A) (4) STATES

"Eye and face PPE shall be distinctly marked to facilitate identification of the manufacturer."

OSHA 29 CFR 1910.133 (A) (5) STATES

"The employer shall ensure that each affected employee uses equipment with filter lenses that have a shade number appropriate for the work being performed for protection from injurious light radiation."

OSHA 29 CFR 1910.133 (B) (1) STATES

Protective eye and face protection devices must comply with ANSI/ISEA Z87.1

PURSUANT TO OSHA REGULATIONS, 29 CFR 1910.132 (SUBPART I), AN EMPLOYER BEARS THE SOLE RESPONSIBILITY FOR SELECTING THE TYPE(S) OF PERSONAL PROTECTIVE EQUIPMENT TO BE USED BY IT'S EMPLOYEES. ALL PURCHASERS OF PERSONAL PROTECTIVE EQUIPMENT FROM CINTAS BEAR FULL RESPONSIBILITY FOR SELECTING THE PPE APPROPRIATE FOR USE BY THEIR EMPLOYEES. CINTAS EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES INCLUDING AN IMPLIED WARRANTY OF MERCHANTABILITY OF FITNESS FOR PARTICULAR PURPOSE.

- 36 COUNT • 280000

HEARING PROTECTION

Businesses operating in work environments with noise levels above 85 dB are required to meet OSHA standards for hearing conservation. Cintas offers a wide selection of industry-leading hearing protection products to choose from — helping you keep them safe and productive.

HEARING PROTECTION TYPES

- Disposable earplugs
- Reusable earplugs
- Earmuffs
- Banded earplugs

DID YOU KNOW?

OSHA STANDARD 29 CFR 1910.95 STATES:

“The hearing conservation program requires employers to monitor noise exposure levels in a way that accurately identifies employees exposed to noise at or above 85 decibels (dB) averaged over 8 working hours, or an 8-hour time-weighted average (TWA) ... Employers must provide hearing protectors to all workers exposed to 8-hour TWA noise levels of 85 dB or above. This requirement ensures that employees have access to protectors before they experience any hearing loss.

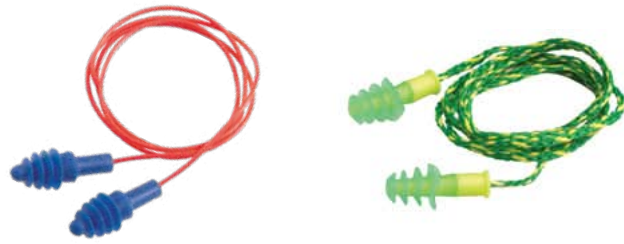

Employees must wear hearing protectors:

- For any period exceeding 6 months from the time they are first exposed to 8-hour TWA noise levels of 85 dB or above, until they receive their baseline audiograms if these tests are delayed due to mobile test van scheduling;
- If they have incurred standard threshold shifts that demonstrate they are susceptible to noise; and
- If they are exposed to noise over the permissible exposure limit of 90 dB over an 8-hour TWA.”

DISCLAIMER: PURSUANT TO OSHA REGULATIONS, 29 CFR 1910.132 (SUBPART I), AN EMPLOYER BEARS SOLE RESPONSIBILITY FOR SELECTING THE TYPE(S) OF PERSONAL PROTECTIVE EQUIPMENT TO BE USED BY ITS EMPLOYEES. ALL PURCHASERS OF PERSONAL PROTECTIVE EQUIPMENT FROM CINTAS BEAR FULL RESPONSIBILITY FOR SELECTING THE PPE APPROPRIATE FOR USE BY THEIR EMPLOYEES. CINTAS EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES INCLUDING AN IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE.

HEARING PROTECTION CATEGORIES

Earplugs come in a wide variety of forms, mostly manufactured from soft plastic, PVC, silicone and polyurethane.

Reusable earplugs

Most commonly come in 3 flange, 4 flange, or twist-in shapes.

Disposable plugs

Most commonly come in six shapes:

- Tapered
- Cylinder
- T-Shaped
- Bell
- Pods/No-roll Foam
- Contoured

Banded earplugs

Not fully inserted into the ear canal like regular earplugs. These stay in place just over the ear canals by a rigid headband that connects the earplugs together.

Earmuffs

Made with sound-attenuating material and soft ear cushions that fit around hard outer cups and are held together with a headband. Earmuffs can come in passive type or active type. Active earmuffs have an electronic component and microphones that allow the user to control their access to communication while attenuating background noise.

HOW TO INSERT A MOLDABLE EARPLUG:

1. ROLL & COMPRESS

Roll earplug using thumb and forefinger until tapered end is compressed

2. REACH & STRETCH EAR

Reach hand over head and gently pull ear upward and outward

3. INSERT & HOLD

Press earplug inside ear canal and hold until earplug expands, about 30 seconds, then push in again to ensure fit

HEARING LOSS FACTS

- Work-related hearing loss can be permanent but is also preventable¹
- Occupational hearing loss, primarily caused by high noise exposure, is the most common U.S. work-related illness²
- According to a study by the CDC, the mining sector had the highest prevalence of workers with any hearing impairment, and with moderate or worse impairment, followed by the construction and manufacturing sectors³

DISPOSABLE EARPLUGS

One of the most common types of hearing protection, disposable earplugs form to the ear when inserted. Lightweight, easy to store and convenient to keep on hand, they come in a variety of sizes and many have a tapered shape for all-day comfort.

TAPERED

BEST SELLER

THE SAFETY DIRECTOR® COMFORT FIT™

WHAT IS NRR?

NRR, or Noise Reduction Rating, is a designation given in decibels (dB) based on laboratory tests designed to estimate the passive noise reduction of the earplug or earmuff. A higher NRR means higher noise reduction effectiveness.*

TAPERED

BEST SELLER

MOLDEX® SPARKPLUGS® PLUGSTATION®

- NRR: 30 dBA
- Superior hearing protection in a lightweight design
- Memory foam on cushions dissipates resistance/relief in headband force
- Sold individually

RESPIRATORY PROTECTION

Having the right respirator can help provide defense against harmful fumes and airborne contaminants — including dust, fog, smoke, mist, gases and vapors. We sell a variety of respiratory products that will help you protect your employees while they're working in hazardous environments.

APPAREL TYPES

- Disposable respirators
- Reusable respirators
- Cartridges and filters

DID YOU KNOW?

OSHA 29 CFR 1910.134 (A) (1) STATES

"In the control of those occupational diseases caused by breathing air contaminated with harmful dusts, fogs, fumes, mists, gases, smokes, sprays, or vapors, the primary objective shall be to prevent atmospheric contamination. This shall be accomplished as far as feasible by accepted engineering control measures (for example, enclosure or confinement of the operation, general and local ventilation, and substitution of less toxic materials). When effective engineering controls are not feasible, or while they are being instituted, appropriate respirators shall be used pursuant to this section."

OSHA 29 CFR 1910.134 (A) (2) STATES

"A respirator shall be provided to each employee when such equipment is necessary to protect the health of such employee. The employer shall provide the respirators which are applicable and suitable for the purpose intended. The employer shall be responsible for the establishment and maintenance of a respiratory protection program, which shall include the requirements outlined in paragraph (c) of this section. The program shall cover each employee required by this section to use a respirator."

DISCLAIMER: PURSUANT TO OSHA REGULATIONS, 29 CFR 1910.132 (SUBPART I), AN EMPLOYER BEARS SOLE RESPONSIBILITY FOR SELECTING THE TYPE(S) OF PERSONAL PROTECTIVE EQUIPMENT TO BE USED BY ITS EMPLOYEES. ALL PURCHASERS OF PERSONAL PROTECTIVE EQUIPMENT FROM CINTAS BEAR FULL RESPONSIBILITY FOR SELECTING THE PPE APPROPRIATE FOR USE BY THEIR EMPLOYEES. CINTAS EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES INCLUDING AN IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE.

DISPOSABLE RESPIRATORS

Designed to be discarded after use, disposable masks and respirators provide short-term protection from airborne particulates. N95 respirators are also designed to have a filter efficiency level of 95% or greater, while general purpose masks filter out dust and mild irritants.

N95

APPAREL

Keeping your employees safe from workplace hazards starts with choosing the right protective apparel based on your needs. From high-visibility garments and disposable coveralls to protective sleeves, aprons and lab coats, Cintas has the safety apparel you need — and your team will appreciate the comfort and convenience on the job.

APPAREL TYPES

- Disposable wear
- Aprons
- Coveralls
- Sleeves
- Lab coats
- Rainwear

THE DIFFERENCE IS IN THE DETAILS

Finding the PPE you need quickly is important, so your employees can be protected and stay productive. Our disposable apparel in **The Safety Director®** brand are packaged clearly, so your employees can find what they need. The icons and product names in English, Spanish and French help make it easy for everyone to find the PPE they need and get back to work.

HIGH VISIBILITY APPAREL — TYPES AND CLASSES

ANSI/ISEA 107-2020 is the current industry consensus standard for High Visibility Safety Apparel (HVSA). The standard designates garment Types for HVSA based on the expected work environment of the wearer. The standard specifies Performance Classes within each type in terms of the minimum area of high visibility materials to be incorporated in the garment.

TYPE O (OFF-ROAD)

Meant for off-road applications. Provides added daytime and nighttime visual enhancement for workers in occupational environments which pose struck-by hazards from moving vehicles, equipment and machinery, but which will not include exposure to traffic on public access roadway rights-of-way or roadway temporary traffic control (TTC) zones.

TYPE R (ROADWAY)

Provides enhanced daytime and nighttime visual conspicuity for workers who are exposed to traffic. This includes exposure to vehicles using the highway for purposes of travel, roadway temporary traffic control (TTC) zones or from work vehicles and construction equipment within a roadway temporary traffic control (TTC) zone.

TYPE P (PUBLIC SAFETY)

Provides enhanced daytime and nighttime visual conspicuity for emergency and incident responders and law enforcement personnel in environments which include exposure to traffic. This Type provides additional options for emergency responders, incident responders, and law enforcement with competing hazards or who require access to special equipment.

PERFORMANCE CLASS 1 (TYPE O ONLY)

Provides the minimum amount of high-visibility materials required to differentiate the wearer visually from noncomplex work environments, in scenarios which the struck-by hazards will not be approaching at roadway speeds, and therefore operative detection and identification distances in the work environment can be shorter than in other situations without compromising safety.

PERFORMANCE CLASS 2 (TYPE R & TYPE P)

Provides for the use of additional amounts of high-visibility materials, which may allow design opportunities to define the human form more effectively. Performance Class 2 HVSA has the potential to provide longer detection and identification distances, and increased conspicuity performance compared to Performance Class 1 HVSA.

PERFORMANCE CLASS 3 (TYPE R & TYPE P)

Performance Class 3 can offer greater visibility to the wearer in both complex backgrounds and through a full range of body movements by mandatory placement of background, retroreflective and combined-performance materials on sleeves and pant legs (if present). Regardless of the area of materials used, a sleeveless garment or vest alone shall not be considered Performance Class 3.

SUPPLEMENTAL CLASS E

Class E apparel includes pants, bib overalls, shorts, and gaiters. These garments are not ANSI compliant for the purposes of meeting HVSA PPE requirements, though, when combined with Class 2 or Class 3 apparel, the combination satisfies Class 3 requirements.

PURSUANT TO OSHA REGULATIONS, 29 CFR 1910.132 (SUBPART I), AN EMPLOYER BEARS SOLE RESPONSIBILITY FOR SELECTING THE TYPE(S) OF PERSONAL PROTECTIVE EQUIPMENT TO BE USED BY ITS EMPLOYEES. ALL PURCHASERS OF PERSONAL PROTECTIVE EQUIPMENT FROM CINTAS BEAR FULL RESPONSIBILITY FOR SELECTING THE PPE APPROPRIATE FOR USE BY THEIR EMPLOYEES. CINTAS EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES INCLUDING AN IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE.

HEAD PROTECTION

Whether they're used to protect against falling objects or to help reduce the danger of electrical shocks and burns, reliable head protection is a critical component of your safety equipment arsenal. Count on Cintas to help you keep your workers safer with our selection of hard hats, bump caps and accessories from leading manufacturers.

HEAD PROTECTION TYPES

- Cap style hard hats
- Full brim hard hats
- Bump caps
- Face shield brackets
- Accessories

DID YOU KNOW?

OSHA 29 CFR 1910.135 (A) (1) STATES

"The employer shall ensure that each affected employee wears a protective helmet when working in areas where there is a potential for injury to the head from falling objects."

OSHA 29 CFR 1910.135 (A) (2) STATES

"The employer shall ensure that a protective helmet designed to reduce electrical shock hazard is worn by each such affected employee when near exposed electrical conductors which could contact the head."

ASK ABOUT OUR HARD HAT LOGO PROGRAM

You can use different colored hard hats and logos to distinguish between employees, contractors and visitors.

DISCLAIMER: PURSUANT TO OSHA REGULATIONS, 29 CFR 1910.132 (SUBPART I), AN EMPLOYER BEARS SOLE RESPONSIBILITY FOR SELECTING THE TYPE(S) OF PERSONAL PROTECTIVE EQUIPMENT TO BE USED BY ITS EMPLOYEES. CINTAS EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES INCLUDING AN IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE.

Categories of Head Protection

HARD HATS

- All hard hats in this brochure meet the requirements outlined in ANSI/ISEA Z89.1-2014
- Designed to protect from falling objects and electrical shock (class dependent)
- Typically consist of a shell and the suspension that work together as a system

BUMP CAPS

- Bump caps are great for applications where hard hats are not required, but some protection from minor bumps and scalp lacerations are needed
- Typically made with a lightweight plastic shell
- Sometimes designed to look similar to a low-profile baseball cap
- Does NOT meet ANSI standards for head protection

Electrical Classes of Hard Hats

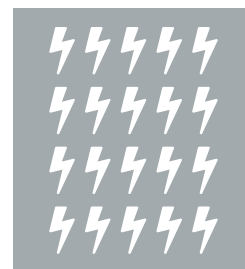

The ANSI/ISEA Z.89.1-2014 Standard categorizes hard hats in the classes and electrical ratings listed below.

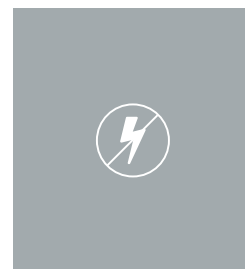

GENERAL
Proof-tested at
2,200 volts

ELECTRICAL
Proof-tested at
20,000 volts

CONDUCTIVE
No electrical
protection

Types of Hard Hats

The ANSI/ISEA Z.89.1-2014 Standard divides hard hats into two categories for impact protection:

TYPE I

Intended to reduce the force of impact resulting from a blow only to the top of the head

TYPE II

Includes a foam liner between the shell and the suspension. Intended to reduce the force of lateral impact from the sides or top of the head

Hard Hat Daily Inspection

For care and maintenance guidance, you should reference the manufacturer's care and maintenance instructions. Many manufacturers recommend a daily inspection and to replace any hard hat demonstrating:¹

- Signs of breakage, cracks, discoloration or chalky appearance on the shell
- Brittleness — you can check by flexing the brim
- Signs of cracks, breaks, frayed straps or damaged stitching on the suspension

If any of these conditions exist, follow the manufacturer's guidelines for replacing the helmet or suspension before use.

Care and Maintenance

For care and maintenance guidance, you should reference the manufacturer's care and maintenance instructions. Many manufacturers recommend following these steps to make sure your hat is well cared for:²

- Clean your hat regularly with mild soap and warm water. Avoid harsh detergents.
- Do not use paints, solvents or hydrocarbon-type cleaners such as M.E.K., thinner, gasoline or kerosene on your hat as they can cause unnoticeable damage.
- Do not throw it, sit on it or use it as a support. Avoid dropping your hat.
- When not in use, store your hat in a clean, dry area in temperatures that do not exceed 120 degrees Fahrenheit.
- Hard hats should not be kept on the rear window shelf of an automobile, in the bed of pickup or in direct sunlight.
- Hard hat replacement: Most manufacturers recommend replacing your hat every 2-5 years, and replacing the suspension every 12 months.

HARD HATS

Hard hats are commonly used in the industrial, utility, oil and gas and construction industries. Thanks to new technology, hard hats are now more comfortable and breathable — with cooling vents for better circulation and lightweight designs for reduced fatigue.

BEST SELLER

CUSTOM LOGO PPE

With our logo program, you can add your company logo or slogan to the personal protection equipment you select for a custom look. You can use different colored hard hats and logos to distinguish between employees, contractors and visitors.

HARD HATS

HARD HATS

- Logo(s) can be placed on the front, back or sides of the hard hat
- Image file for logo can contain up to four colors
- State-of-the-art pad printing for a high quality, long-lasting logo
- Lead time is 2-4 weeks upon customer approval of final proof

MINIMUM ORDERS:

PIP HARD HATS • 12 HATS MSA HARD HATS • 20 HATS
PIP BUMP CAPS • 20 CAPS PYRAMEX BUMP CAPS • 16 CAPS

EYE AND FACE

EYE AND FACE PROTECTION

- Logos can be set up in multiple colors
- Lead time varies by brand upon customer approval of final proof
- Minimum order quantity required and may vary depending on the selected style

HI VIS APPAREL

HIGH VISIBILITY APPAREL

- Logos can be set up in multiple colors
- Logos are screen printed onto the back of your selected apparel
- 2-3 week lead time upon customer approval of final proof
- Minimum order quantity required depending on the selected apparel

LOGO PROGRAM GARMENTS MAY NOT SATISFY ANSI REQUIREMENTS FOR HIGH VISIBILITY APPAREL. CUSTOMER SHOULD REFERENCE THE FULL ANSI STANDARD FOR MORE DETAILED INFORMATION WHEN MAKING PRODUCT DECISIONS AND IT IS CUSTOMER'S RESPONSIBILITY TO DETERMINE WHETHER LOGO PROGRAM GARMENTS SATISFY ANSI REQUIREMENTS FOR HIGH VISIBILITY APPAREL.

WATERBREAK® AND HYDRATION

You have plenty of work to do, and we know how much you care about your team. Whether your employees are at risk of experiencing heat stress or just trying to stay properly hydrated on the job, we have the flexible solutions you need. Choose from several electrolyte options from leading brands, or talk to your rep about WaterBreak®, a cleaner, more affordable water system and service.

HYDRATION PRODUCTS INCLUDE:

Coolers and accessories.....	136
Electrolytes	138
YETI®.....	140

WORKPLACE HYDRATION

Support your team's productivity and overall physical and mental health with WaterBreak® — our eco-friendly, closed water system that delivers filtered and refreshing water to your employees.

STATISTICS*

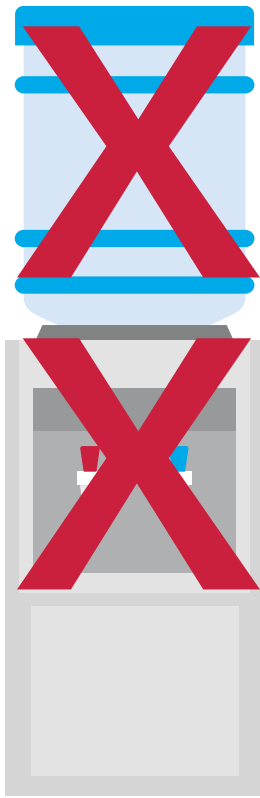

- 74% of employed Americans believe it is important that their workplace offers a sustainable and environmentally friendly water cooler
- Roughly 1 in 4 employed Americans (24%) say their workplace does not have a water cooler station available to employees
- A majority of employed Americans believe the availability of a well-maintained water cooler station is important for employee satisfaction (80%) and well-being (82%)

OSHA 1926.51(A)(1)

An adequate supply of potable water shall be provided in all places of employment.

OSHA 1910.141 (B)(1)(I)

Potable water shall be provided in all places of employment.

USING LARGE WATER BOTTLES?

Benefits of switching to WaterBreak®:

- Avoid lifting heavy bottles
- No need to worry about storage
- No unsightly bottles lying around
- Flat monthly billing
- Never run out of water
- No more dirty dispensers or drip trays

ALREADY HAVE A WATER COOLER?

Benefits of switching to WaterBreak®:

- No dirty drip tray buildup
- Regular filter changes
- Affordable price
- Industry leading unit
- Flat monthly billing
- Consistently clean and professional look

*2024 HARRIS POLL SURVEY CONDUCTED ON BEHALF OF CINTAS

BENEFITS OF SERVICE

- Internal drain bottle or drip tray emptied
- Filter changed annually and as needed
- Unlimited water at your fingertips
- Each unique barcode scanned to maintain service record

THE WATERBREAK® PREMIUM

- Closed water system for cleaner operation
- Hot, cold and room temperature water
- Hot water safety feature
- 2x cooling ability compared to leading units
- Self-draining drip tray (1½ gallon)
- Dimensions: 12.6" x 13.4" x 43.7"

PART NUMBER: 700001

THE WATERBREAK® COUNTERTOP

- Hot, cold and room temperature water
- Closed water system for cleaner operation
- Hot water safety feature
- Polymer cabinet won't rust or scratch countertop
- Less than 17" tall, fits under most kitchen cabinets
- Fits large coffee containers & sport bottles
- Dimensions: 13.3" x 14.5" x 16.9"

PART NUMBER: 700001CT

BENEFITS OF FILTER AND DRAIN SYSTEM

- Reduces the occurrence of lead, chlorine and odor
- Improves the taste and appearance of drinking water
- Provides water that is virtually free of sediment, dirt and rust
- 1½ gallon bottle and hose captures excess fluid
- Unique drain bottle feature helps prevent buildup and overflow in drip tray

EMERGENCY EYEWASH AND SHOWER SERVICE

Eyewash systems play a pivotal role in your employees' safety, so it's critical that you establish and practice proper safety protocols. The Cintas free-standing stations and plumbed shower stations, serviced by our expert team, help keep you focused on safety and prepared for eye emergencies.

EYEWASH PRODUCTS INCLUDE:

The Safety Director® emergency eyewash	156
Plumbed eyewash	159
Additional eyewash	160

SAFETY CENTER

EMERGENCY EYEWASH STATIONS

Eyewash stations can often go unused and unnoticed until disaster strikes. With routine eyewash service and maintenance, you don't have to worry about your stations being prepared to respond in an emergency — Cintas has the products you need to stay **Ready for the Workday®**.

ANSI/ISEA Z358.1-2014(R2020)

This standard is commonly referred to for emergency eyewash and showers. Some points include:

- Flush both eyes simultaneously
- Eyewash flush rate of 0.4 gallons per minute
- Flush for 15 minutes
- Be hands-free and offer valves with constant flow
- Activate in one second or less
- Be located within 10 seconds of hazard
- Be located within a clear path
- Place a highly visible sign identifying the station

TYPES OF EYEWASH STATIONS

Self-contained units:

- 15 minute flow
- Often placed near forklift stations and chemical storage areas

Supplemental units:

- One time use
- Commonly found in bottle form and in a variety of sizes

Plumbed units:

- Built directly into a building's water source
- Requires weekly activation and annual inspection

Did you know?

Safety Data Sheets are designed to provide employees and first responders with the proper protocols for handling certain substances. Reference Section 4 of any SDS for emergency procedures and to determine if you need an eyewash station.

THE SAFETY DIRECTOR® EMERGENCY EYEWASH

EWYEWASH STATION

THE SAFETY DIRECTOR® EYEWASH STATION

- Activates in less than one second
- Hands-free flushing of both eyes at the same time
- Provides 15-minute flow
- 19¾" x 22" x 18"

PART NUMBER: 133441

EWYEWASH DRAIN CART

THE SAFETY DIRECTOR® EYEWASH DRAIN CART

- Easy collection of used flushing fluid
- Dual wheels with solid axle for easy portability
- 31.75" x 14" x 14.5"

PART NUMBER: 6184800

EWYEWASH STAND

THE SAFETY DIRECTOR® EYEWASH STAND

- Fits The Safety Director® Eyewash Station
- Sturdy, industrial grade
- Allows station placement in virtually any environment without wall mounting
- 57.5" x 24" x 17.5"

PART NUMBER: 132246

BENEFITS OF SERVICE AGREEMENT

Routine service from our dedicated Cintas eyewash service professionals throughout North America can help you trust that you're **ready™** to respond when there is an emergency.

- All equipment is provided
- Includes quarterly service
- Barcode scanning
- Electronic service records
- Eyewash station cleaning and refilling
- Clear communication
- Consistent monthly invoicing

EWYEWASH ACCESORIES

EWYEWASH V-SIGN

- Helps signal to employees and visitors in your facility about the availability and location of your eyewash stations

PART NUMBER: PZV1EW03A

ADDITIVE CONCENTRATE

- Provides protection against bacteria, fungi, algae, staph and acanthamoeba growth

PART NUMBER: 584953

EWYEWASH STATION MAT

- Protects floors from water hazard
- All-rubber construction for extreme durability
- Creates a defined area in front of the station to prevent station from being blocked

PART NUMBER: 13216

HEATED EYEWASH AND DUST COVER

Be prepared in different types of environments — these units and accessories help protect your emergency eyewash station from external elements.

HEATED EYEWASH

GUARDIAN AQUAGUARD HEATED EYEWASH

- Self contained and portable
- 16 gallon gravity-flow
- Insulating jacket helps endure low or freezing temperatures
- Ideal for both inside and outside environments

PART NUMBER: 563051

DUST COVER

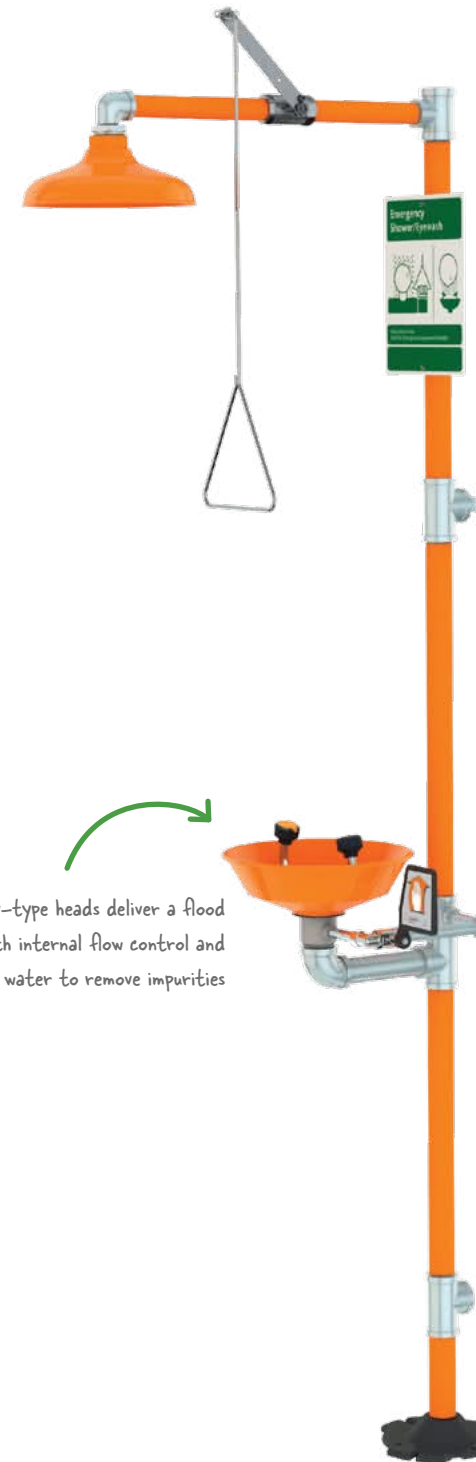

EYEWASH STATION DUST COVER

- Custom-fit to keep dust and debris out
- Hook and loop closure allows for easy, one-step activation

PART NUMBER: 619523

EMERGENCY PLUMBED EYEWASH

Let your dedicated Cintas professional help you manage your emergency eyewash and shower with our weekly, monthly, quarterly and annual service inspections.

GUARDIAN COMBINATION EYEWASH AND SHOWER STATION

- Shower head and eyewash bowl made of ABS plastic
- Each spray head has a "flip top" dust cover
- Eyewash Bowl: 11¾" diameter orange ABS plastic

PART NUMBERS:

- STATION WITH PLASTIC BOWL • 1660040

FIRST AID, CPR AND AED

Cintas is the largest national provider of American Heart Association First Aid training. This course includes hands-on instruction with engaging training your employees will enjoy. One-to-one student-mannequin ratio allows for personalized instruction and feedback. Also available as an online course with in-person CPR skills assessment.

AHA HEARTSAVER FIRST AID, CPR AND AED TRAINING COURSE #650011

- Recognize and treat adult emergencies prior to EMS arrival
- Determine when and how to administer basic first aid
- Learn to provide chest compressions and breaths
- Effectively use an AED (automated external defibrillator)
- Female mannequin accessories available for hands-on practice

29 CFR 10.151(b) "In the absence of an infirmary, clinic, or hospital in the near proximity to the workplace, which is used for the treatment of all injured employees, a person or persons shall be adequately trained to render First Aid."

AVAILABLE FORMATS: ● ONSITE ● ONLINE*

* MUST COMPLETE SKILLS CHECK FOR PROPER CERTIFICATION

WHAT IS OSHA CFR? TITLE 29 OF THE CODE OF FEDERAL REGULATIONS IS THE LEGISLATION GOVERNING THE U.S. OCCUPATION SAFETY AND HEALTH ACT, ESTABLISHED IN 1970 TO PREVENT WORKPLACE INJURIES, ILLNESSES AND DEATH.

BASIC LIFE SUPPORT (BLS)

Suitable for first responders or healthcare providers, this course provides training on necessary skills for sustaining life in and out of a hospital.

BASIC LIFE SUPPORT COURSE #65022

- High quality CPR for adults, children and infants
- The AHA Chain of Survival and BLS components
- Using an AED (automated external defibrillator)
- Effective ventilations using a bag-valve mask (BVM)
- Importance of teams and team member performance in multi-rescuer resuscitation
- Relief of foreign-body airway obstruction for adults and infants

AVAILABLE FORMATS: ● ONSITE ● ONLINE*

* MUST COMPLETE SKILLS CHECK FOR PROPER CERTIFICATION

BLOODBORNE PATHOGENS

Many bloodborne infections have no cure. Universal precautions and proper body fluid cleanup are important to protect ourselves and those around us. This course covers what measures to take prior to, or in case of, exposure to bloodborne pathogens.

BLOODBORNE PATHOGENS COURSE #65003

- Defining bloodborne pathogens
- Preventative and control measures
- Vaccination options
- Universal precautions and PPE
- Exposure incident protocol

29 CFR 1910.1030(g)(2)(i) "Employers shall ensure that all employees with occupational exposure participate in a training program which must be provided at no cost to the employee..."

29 CFR 1910.1030(g)(2)(iv) "Annual training for all (applicable) employees shall be provided within one year of their previous training."

AVAILABLE FORMATS: ● ONSITE ● ONLINE

BLEEDING CONTROL

The #1 cause of preventable death is loss of blood after an injury. Life-threatening bleeding can happen anywhere due to serious accidents. This course is designed to help you and your team quickly identify and respond to life-threatening bleeding. Through hands-on training, your instructor will teach you various techniques to control bleeding effectively.

BLEEDING CONTROL COURSE #620414

- Scene safety and PPE
- How to identify life threatening bleeding
- Tourniquet usage with hands-on practice
- Using direct pressure to control blood loss
- Wound packing with hands-on practice

ANSI/ISEA Z3081.1-2021 "A tourniquet used for blood drawing is insufficient to meet the criteria set forth. Common arterial tourniquets that meet this standard utilize a method such as a ratchet or a windlass to reach full occlusion. Application scenarios include trapped and open limb application as well as the ability to self-apply and apply to a victim."

AVAILABLE FORMATS: ● ONSITE

FIRE PREVENTION AND RESPONSE

General maintenance and housekeeping is the first step in preventing a fire but your employees also need to know what to do in this type of emergency. In this course, employees will learn how to prevent and how to respond to a fire with hands-on fire extinguisher practice.

FIRE PREVENTION AND RESPONSE COURSE COURSE #65222

Course topics include:

- What causes a fire
- Fire prevention methods
- Types of fire extinguishers
- How to correctly use a fire extinguisher
- When not to fight a fire
- Hands-on practice also available with VR simulation

29 CFR 1910.157(g)(1) "Where the employer has provided portable fire extinguishers for employee use in the workplace, the employer shall also provide an educational program to familiarize employees with the general principles of fire extinguisher use and the hazards involved with incipient stage fire fighting."

29 CFR 1910.157(g)(2) "The employer shall provide the education required in paragraph (g) (1) of this section upon initial employment and at least annually thereafter."

FORKLIFT SAFETY

Forklift accidents can lead to injuries, property damage, and can even harm a company's reputation. Appropriate training can help your employees avoid forklift accidents and help your business comply with OSHA's forklift standard.

FORKLIFT/POWERED INDUSTRIAL TRUCK (PIT) SAFETY COURSE COURSE #65308 SKILLS CHECK #652091

Course topics include:

- The different types of PITs — sit down forklift, stand up forklift, powered pallet jack, reach truck and order picker
- How to perform pre-use inspections
- Safe operation
- Refueling and recharging
- Record keeping forms
- Hands-on practice and skills testing

29 CFR 1910.178(l)(1)(i) "The employer shall ensure that each powered industrial truck operator is competent to operate a powered industrial truck safely, as demonstrated by the successful completion of the training and evaluation specified in [1910.178(l)]"

29 CFR 1910.178(l)(2)(ii) "Training shall consist of a combination of formal instruction (e.g., lecture, discussion, interactive computer learning, video tape, written material), practical training (demonstrations performed by the trainer and practical exercises performed by the trainee) and evaluation of the operator's performance in the workplace."

29 CFR 1910.178(l)(4)(iii) "An evaluation of each powered industrial truck operator's performance shall be conducted at least once every three years."

ELECTRICAL AWARENESS COURSE #65242

- Explain various electrical hazards and the threats they pose to worker safety
- Distinguish between a Qualified and an Unqualified employee
- Identify common ways to prevent accidents and protect themselves from electrical hazards
- Recognize what to do in the event of an electrical emergency

AVAILABLE FORMATS: ● ONSITE ● ONLINE

AERIAL LIFT SAFETY COURSE #65207

- Explanation of electrical, fall and falling object hazards
- Job site risk assessment
- Instructions for correct operation and skills demonstrations

29 CFR 1960.66(i)(1)(iii) "Working platforms may be operated only by persons who are proficient in the operation, safe use and inspection of the particular working platform to be operated."

29 CFR 1910.66(i)(1)(v) "The employer must certify that employees have been trained. The certification record had to include the identity of the person trained, the signature of the employer or the person who conducted the training and the date that training was completed. The certification record must be maintained for the duration of the employee's employment."

AVAILABLE FORMATS: ● ONSITE ● ONLINE
 ● TRAIN-THE-TRAINER

EMERGENCY PREPAREDNESS COURSE #65218

- Explanation of the four major types of emergencies
- Development of an emergency action plan
- The importance of effective drills
- Tips for returning to normal operation

29 CFR 1910.38(b) "...An emergency action plan must be in writing, kept in the workplace, and available to employees for review... an employer with 10 or fewer employees may communicate the plan orally..."

29 CFR 1910.38(e) "An employer must designate and train employees to assist in safe and orderly evacuation of other employees."

29 CFR 1910.38(f)/(1-3) "...An employer must review the emergency action plan with each employee covered by the plan... When the plan is developed or the employee is assigned initially to a job; when the employee's responsibilities under the plan change; and when the plan is changed."

HAZARDOUS WASTE OPERATIONS AND EMERGENCY RESPONSE (HAZWOPER)

- Hazardous waste clean up
- Corrective actions involving clean up
- Treatment, storage or disposal
- Emergency response

CFR 1910.120(b)(1)(i). "Employers shall develop and implement a written safety and health program for their employees involved in hazardous waste operations. The program shall be designed to identify, evaluate, and control safety and health hazards, and provide emergency response for hazardous waste operations."

COURSES AVAILABLE:

HAZWOPER 8-HOUR • 65507

HAZWOPER 24-HOUR • 65506

HAZWOPER 40-HOUR • 65505

AVAILABLE FORMATS: ● ONSITE ● ONLINE

HAZARD COMMUNICATION/GHS COURSE #65226

- The Globally Harmonized System for Hazard Communication
- Chemical labels and Safety Data Sheets
- Proper precautions, including information on the effective use of PPE
- Emergency procedures for handling chemical exposures

29 CFR 1910.1200(h)(1) "Employers shall provide employees with effective information and training on hazardous chemicals in their work area at the time of their initial assignment, and whenever a new chemical hazard the employees have not previously been trained about is introduced into their work area..."

AVAILABLE FORMATS: ● ONSITE ● ONLINE

OPIOID EPIDEMIC AND NALOXONE

- Understanding how opioids work
- Recognizing an opioid overdose
- Responding to an overdose
- Hands-on practice of naloxone delivery

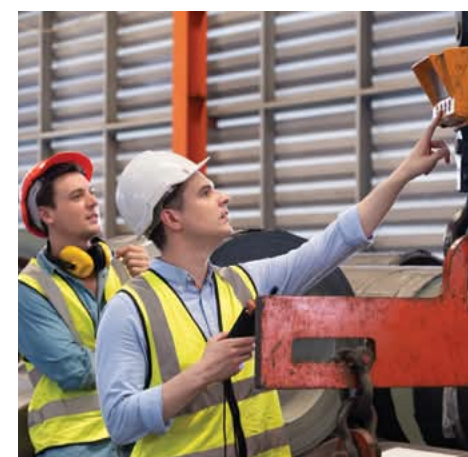

AVAILABLE FORMATS: ● ONSITE

HAZARDOUS MATERIAL (HAZMAT) COURSE #616655

- Training covers general awareness, safety and security requirements
- Review of federal hazardous materials regulations
- How to read and use hazardous materials table
- Properly label and mark hazardous material containers for shipment
- Complete Bill of Lading for hazardous materials
- Select proper packaging for hazardous materials
- Understand the vehicle placarding requirements
- Develop appropriate emergency response information to accompany shipments

AVAILABLE FORMATS: ● ONSITE ● ONLINE

OVERHEAD CRANE SAFETY COURSE #65211

- How to properly perform a pre-use inspection
- Safe operation of different types of cranes and proper lift techniques
- Hands-on skills assessment

AVAILABLE FORMATS: ● ONSITE ● ONLINE

SAFETY COURSES

Ask your Cintas representative about our dosimeter testing to help get a reading on the noise levels in your facility.

RESPIRATORY PROTECTION AND FIT TESTING

- Why respirators are important
- Proper selection, fitting, inspection and storage of respirators
- How to properly use a respirator

29 CFR 1910.134(k) "... the employer [is] to provide effective training to employees who are required to use respirators. The training must... recur annually..."

29 CFR 1910.134(k)(3) "The employer shall provide the training prior to requiring the employee to use a respirator..."

COURSES AVAILABLE:

- RESPIRATORY PROTECTION** • 65252
- QUANTITATIVE FIT TESTING** • 665501
- QUALITATIVE FIT TESTING** • 65500

- AVAILABLE FORMATS: ● ONSITE ● ONLINE
- ON-SITE TESTING
 - TRAIN-THE-TRAINER

We also provide on-site respirator fit testing and online medical clearance questionnaires. Please note: Medical clearance is required prior to an employee's initial fit test.

SCISSOR LIFT SAFETY

- Recognize the various types of hazards associated with scissor lifts
- Safe work practices related to inspections, maintenance, stabilization and use of fall protection

- AVAILABLE FORMATS: ● ONSITE ● ONLINE

WHAT IS OSHA CFR? TITLE 29 OF THE CODE OF FEDERAL REGULATIONS IS THE LEGISLATION GOVERNING THE U.S. OCCUPATION SAFETY AND HEALTH ACT, ESTABLISHED IN 1970 TO PREVENT WORKPLACE INJURIES, ILLNESSES AND DEATH.

OSHA 10 AND 30 HOUR

- Awareness of common job-related safety and health hazards
- Basic training on the recognition, avoidance, abatement, and prevention of workplace hazards
- Provides information regarding workers' rights, employer responsibilities and filing a complaint
- Workplace topics like emergency action plans, fire prevention, personal protective equipment and more

- AVAILABLE FORMATS: ● ONSITE ● ONLINE ● VIRTUAL

LOCKOUT/TAGOUT

- LOTO definitions and most common forms of energy sources
- Situations that require LOTO procedures, types of devices and their proper use
- Safe start-up procedures and tips for special situations
- Training for authorized and affected employees

COURSES AVAILABLE:

- LOTO AWARENESS FOR AFFECTED EMPLOYEES** • 65234
- LOTO FOR AUTHORIZED EMPLOYEES** • 620394

29 CFR 1910.147(c)(7)(i) "The employer shall provide training to ensure that the purpose and function of the energy control program are understood by employees and that the knowledge and skills required for the safe application, usage, and removal of the energy controls are acquired by employees..."

29 CFR 1910.147(c)(7)(i)(A) "Each authorized employee shall receive training in the recognition of applicable hazardous energy sources, the type and magnitude of the energy available in the workplace, and the methods and means necessary for energy isolation and control."

- AVAILABLE FORMATS: ● ONSITE ● ONLINE

ARC FLASH SERVICES

OSHA and the National Fire Protection Association (NFPA) make it clear that employers must assess the workplace for hazards. Not just general hazards, but those that necessitate the use of PPE. There are three known electrical hazards: arc flash, arc blast and electrical shock. Each of these hazards requires use of PPE as well as identification through a process known as arc flash and shock risk assessment.

- 29 CFR 1910.132(d)(1) states: "The employer shall assess the workplace to determine if hazards are present, or are likely to be present, which necessitate the use of personal protective equipment (PPE). If such hazards are present, or likely to be present."
- NFPA 70E Article 130.5 states: "An arc flash risk assessment shall determine if an arc flash hazard exists, the arc flash boundary, and the PPE to be used within the arc flash boundary."
- NFPA 70E Article 130.5 (G) states: "The incident energy analysis (arc flash risk assessment) shall be updated when changes occur in the electrical distribution system that could affect the results of the analysis. The incident energy analysis shall also be reviewed for accuracy at intervals not to exceed 5 years."

ASK US ABOUT OUR ARC RATED CLOTHING AND PPE

We offer a full selection of Men's and Women's Arc Rated clothing so that you can customize a program to fit your exact needs. We also can provide you with category 4 Arc Flash Suits and the Head and Hand Arc Flash/Shock protection that is often required when working on electricity, as outlined in NFPA 70E.

WARNING	
Arc Flash and Shock Hazard Appropriate PPE Required	
5.6 Cal/cm ² @ 18" (Incident Energy)	Nominal System Voltage 480V Arc Flash Boundary 51.9" Limited Approach Boundary 42" Restricted Approach Boundary 12"
<small>AF PPE: Arc-Rated: Shirt, Pants, or Coverall, Face Shield, Balaclava (Rating must be greater than or equal to listed Incident Energy) Shock PPE: Class 00 or Higher Voltage Gloves, Voltage Rated Tools Other PPE: Hard Hat, Safety Glasses, In Canal Hearing Protection, Leather Gloves, Leather Footwear</small>	
<small>Equipment Name: PNL-HV-2 Lockout Device: MDP-37 Date: 1-1-21</small>	

DISCLAIMER: CINTAS' ARC FLASH RISK ASSESSMENT IS CONDUCTED BY AN UNAFFILIATED THIRD-PARTY AND CINTAS DOES NOT MAKE OR PROVIDE ANY REPRESENTATIONS, RECOMMENDATIONS, OR GUIDANCE WITH RESPECT TO ELECTRICAL HAZARDS PRESENT IN THE WORKPLACE OR THE PERSONAL PROTECTIVE EQUIPMENT ("PPE") THAT IS NECESSARY FOR ANY PARTICULAR WORKPLACE. IT IS THE SOLE RESPONSIBILITY OF THE EMPLOYER TO PERFORM WORKPLACE ASSESSMENTS TO IDENTIFY POTENTIAL HAZARDS THAT EXIST IN THE WORKPLACE, IN ACCORDANCE WITH OSHA 1920.132. THE EMPLOYER IS SOLELY RESPONSIBLE FOR DETERMINING THE NECESSARY PPE TO PROVIDE TO EMPLOYEES BASED ON THE ARC FLASH HAZARDS THAT EXIST IN THE WORKPLACE. CINTAS SHALL HAVE NO LIABILITY TO THE CUSTOMER, THE EMPLOYER, ITS EMPLOYEES OR ANY OTHER PERSON OR ENTITY RELATING TO CINTAS' ARC FLASH RISK ASSESSMENT OR ANY SERVICES RELATED THERETO. CINTAS DISCLAIMS ALL WARRANTIES OTHER THAN AS EXPRESSLY PROVIDED.

Originally developed at OSHA's request, NFPA 70E helps companies and employees avoid workplace injuries and fatalities due to shock, electrocution, arc flash and arc blast, and assists in complying with OSHA 1920 Subpart S and OSHA 1926 Subpart K.

NFPA 70E ARC FLASH TRAINING

Our instructors can provide Arc Flash training. This course will cover the following topics:

- OSHA Regulations and NFPA 70E Electrical Safety Standards
- Safe work practices
- Proper Lockout/Tagout
- Understanding Arc Flash and Arc Blast
- Selection of Personal Protective Equipment
- And many more

AVAILABLE FORMATS: ● ONSITE ● ONLINE

NFPA 70E ARC FLASH ASSESSMENT

A proper Arc Flash Risk Assessment is both site and equipment specific. Cintas can connect you to third party vendors who will help provide an Arc Flash Assessment specific to the equipment installed. This assessment will take into account the design of the existing electrical distribution network and will include the following:

- Data Collection
- One-Line Diagram Development
- Analysis
- Equipment Labels

DISCLAIMER: CINTAS TRAINING PROGRAMS ARE INTENDED TO ASSIST EMPLOYERS AS THEY STRIVE TO IMPROVE AND MAINTAIN WORKPLACE HEALTH AND SAFETY. FEDERAL AND STATE STATUTES AND REGULATIONS MAY REQUIRE THAT EMPLOYERS CONDUCT SPECIFIC SAFETY AND/OR TRAINING PROGRAMS FOR THEIR EMPLOYEES. EMPLOYERS ARE SOLELY RESPONSIBLE FOR DETERMINING WHICH SAFETY AND/OR TRAINING PROGRAMS THE LAW REQUIRES. CINTAS'S TRAINING PROGRAMS ARE PROVIDED FOR EDUCATIONAL PURPOSES ONLY, AND CINTAS DOES NOT PROVIDE RECOMMENDATIONS OR GUIDANCE REGARDING WHICH SAFETY AND/OR TRAINING PROGRAMS ARE REQUIRED. CINTAS SHALL HAVE NO LIABILITY TO CUSTOMER OR ANY OTHER PERSON RELATING TO OR RESULTING FROM THE TRAINING PROGRAMS OR THE INFORMATION PROVIDED IN CONNECTION WITH THE TRAINING PROGRAMS.

ONLINE TRAINING AND TOOLS

In today's busy workplace, keeping your employees trained can be challenging. Cintas can help with instant access to the training content and compliance resources you need.

ONLINE TRAINING:

Choose from 950+ topics for interactive online training for remote employees, multiple shifts, new hires and employees absent from classroom training.

Online courses include:

- Scored quizzes to help gauge comprehension
- Mobile capability for access on tablet or phone
- Online record keeping and completion tracking

STREAMING TRAINING VIDEOS:

Access hundreds of online video courses that provide you with anywhere, anytime instruction on the safety and compliance topics important in your industry.

Training materials included*:

- PowerPoint® presentations
- Trainer guides
- Quizzes
- Checklists
- Posters
- Supplemental videos

*TRAINING MATERIALS VARY BY TITLE

J. J. KELLER® SAFETY MANAGEMENT SUITE

It's not enough to train your employees ... you need written programs, regulatory know-how and documentation to back it up. But managing all that can be a tall order. That's why Cintas is collaborating with J. J. Keller to bring you the Safety Management Suite.

YOU'LL GET INSTANT ACCESS TO:

Expert Help: Ask J. J. Keller's experts an unlimited number of compliance questions in a secure, private environment.

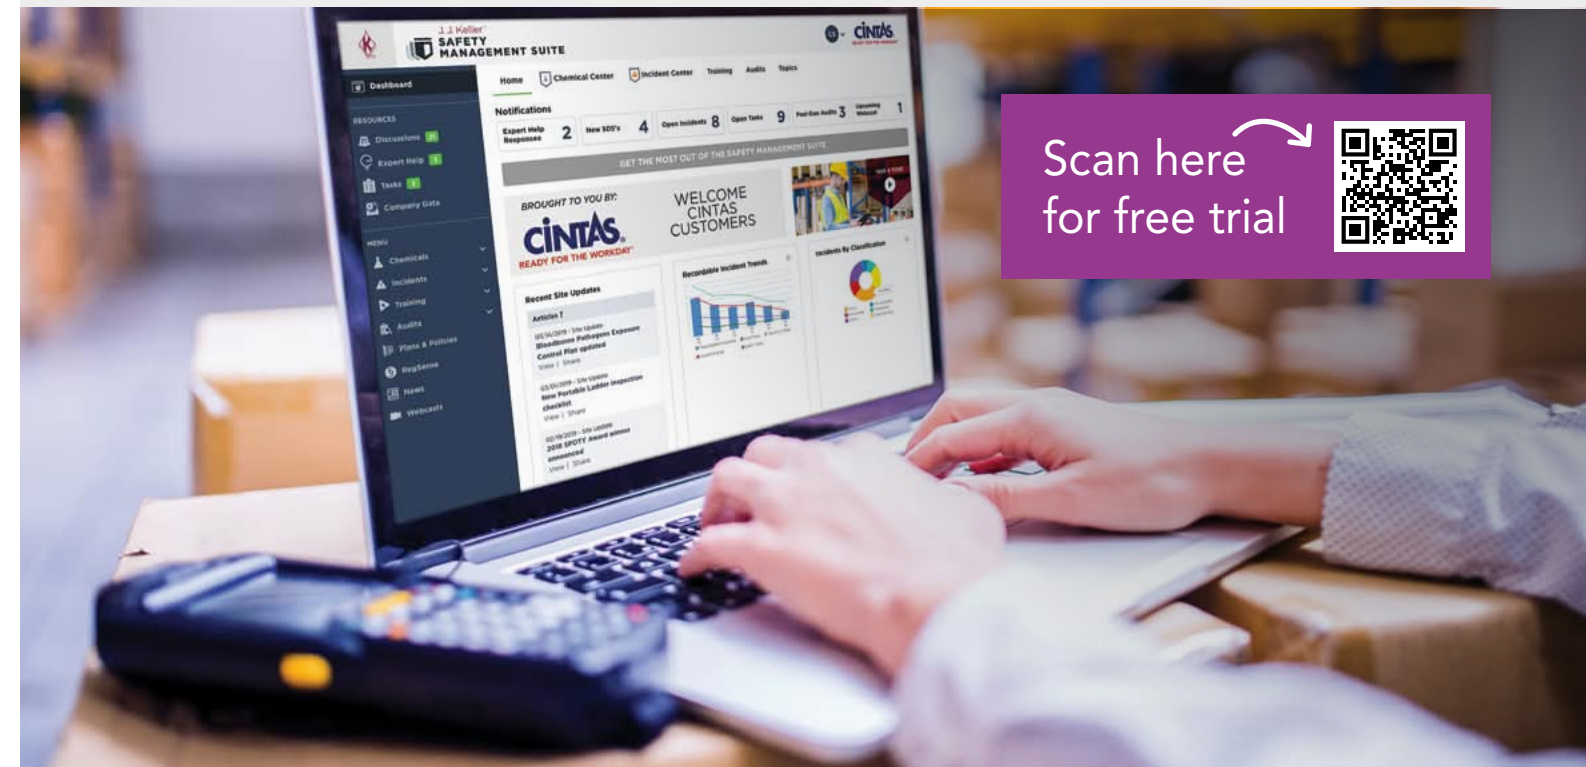

Chemical Management: Maintain a comprehensive hazard communication program with easy access to an expansive safety data sheet (SDS) library.

Written Safety Plans: Create custom safety plans tailored to the unique needs of your organization.

Streaming Training Videos: Supplement employee training with high-quality video content on hundreds of topics relevant to your workplace.
