

National Public Seating

MANUFACTURING EXCELLENCE SINCE 1981

2026 CATALOG

NPS outfits industries across the nation with no-fail equipment used every single day.

DID YOU KNOW ?

NPS operates a nationwide manufacturing and Lightning Ship distribution network, anchored by its primary hub in Clifton, New Jersey, with additional Lightning Ship facilities in Memphis, Tennessee, and Santa Fe Springs, California. These strategically positioned locations enable efficient nationwide distribution through advanced logistics systems and direct access to major transportation networks.

NPS Manufacturing Hub:

📍 Clifton, NJ 07014 (NJ)

Lightning Ship Facilities:

📍 Clifton, NJ 07014 (CL)

📍 Memphis, TN 38106 (TN)

📍 Santa Fe Springs, CA 90670 (CA)

Manufacturing Excellence

Founded in 1981, NPS brings decades of manufacturing expertise supported by a robust global supply chain. Our New Jersey team designs and builds industrial-grade furniture engineered for continuous, real-world use. With in-house design, engineering, and testing, every product bearing the NPS name is built to meet the highest standards of performance, durability, and reliability.

We manufacture with purpose.

— Crafted to Perform

National Public Seating® designs and engineers furniture built for real-world use. With patented innovations, in-house engineering, and certified testing, our products deliver reliable performance in schools, institutions, and high-demand environments nationwide.

— Solutions for Every Learning Environment

NPS delivers purpose-built furniture engineered to perform across diverse educational spaces, including cafeterias, performing arts rooms, science labs, makerspaces, and modern CTE environments.

— Industry Standards You Trust

Our products are designed, tested, and certified to meet rigorous safety, durability, and performance standards reinforcing our commitment to quality, compliance, and long-term reliability.

Custom designed to reflect your identity. Built to perform.

NPS DESIGN SERVICES

You think it. We create it.

We specialize in designing spaces for institutional spaces, offering a comprehensive service that includes creating 2D and 3D renders to give you a clear visual of how your space will look and how many students will comfortably fit.

The Perfect Way to Show your School's Pride

WE DESIGN

CUSTOM ARTWORK

Matching your logo with artwork that brings your space to life!

We offer the ability to print Custom Designs on our HPL Tabletops. Whether you want to show off your School Logo, Mascot, or simply a Creative Design for Your Space, we can help make it happen.

Custom Size Tables

Upcharge and extended lead time apply

We can build any length tabletop on the smaller size frame (up to 120" long).

We will install it onto the closest smaller size frame (60", 72", 84" & 96" Length).

Recessed Legs

**Available only for rectangle shape | Upcharge and extended lead time apply*

Table legs can be recessed to your ideal placement to help maximize seating space. When recessing legs, only the legs for which a dimension is noted will be recessed. Any non-specified legs will be mounted at the standard placement.

To recess the right leg:

Add **R** followed by distance from the edge of the tabletop at the end of model number (i.e. R12)

To recess the left leg:

Add **L** followed by distance from the edge of the tabletop at the end of model number (i.e. L8)

Note the dimension (in inches) from the edge of the tabletop

If the distance between legs is less than 58" Table Will Not Fold Flat

Model Number Configuration

Custom Length
MSFT 24108 PW EB GY

Model Number Configuration

Right Leg Recessed Distance from Edge
MSFT 2448 PW EB GY R12 L8
 Left Leg Recessed Distance from Edge

- Please note:**
- All testing was conducted with standard tabletop and leg configurations. Recessing legs or customizing tabletops may cause table to be susceptible to tipping.
 - Please allow up to 2 inch tolerance.

Heavy Duty Tables Specs

The **NPS Heavy Duty Table** is ideal for any makerspace environment. The 16-Gauge apron and 14-Gauge legs make this table virtually indestructible. Available with either fixed or adjustable height legs. Adjustable legs can be raised in 1" increments and are locked firmly in place with 2 K-9 external tooth lock washers and heavy duty tamper-free hex screws. All legs come standard with simple-adjust glides and have a caster option for easy mobility. **Play. Work. Study.**

Robotics Bumper Kit

*Discover the future of robotic safety with our versatile and heavy-duty **Robotics Bumper Kit**! Ideal for all types of robotic environments, this kit can be seamlessly installed on almost any rectangular table, both new and existing.*

STEEL TABLES | TBK SERIES Robotics Bumper Kit Specs

Convert any Table into a Fun Hub with Our Easy-Install Bumper Kit!

Kit Includes:

- 4 Corner Brackets
- 4 Side Clamps
- 4 Bumper Panels

**TOOL FREE
INSTALLATION**

Personalized for You!

Specify the width and length of your rectangular tabletop for your Bumper Kit preparation, ensuring it is of the same size. Ensure there are no obstructions within 1.5 inches from the edge of the tabletop so that the bumper system can be securely mounted.

Note: Compatible with all NPS Rectangular Tables except SLT6 and MSFT

Standard Features

Simplified Setup with Tool Free Assembly

Compatible with Tabletops up to 1.75" thick

Center Clamps for Ultimate Security

Unique Bumper Style Compatible with Wood or Acrylic Panels

Heavy-Duty Knob Assembly Ensures Unit is Secure when in Use and Allows for Simple Takedown

Corner Brackets and Side Clamps are constructed of 13-Gauge and 6-Gauge Steel Parts

Bumper Type Bumper Panels are 4" High

Bench Laminate Extra Ganger

Sophistication made Simple with Safety in mind.

NPS Mobile Tables are sophisticated in design yet simple to operate. Offering enhanced safety features giving you complete peace of mind.

Frame Design *Intelligent steel understructure design supports table tops and seating providing ease of operation and maintenance.*

Table Top Apron Support

- Each top is supported by 2" deep, 14-gauge steel aprons capped at the ends with riveted plastic protectors.
- Aprons and brackets are fastened to wood with custom designed tamper-resistant screws with superior holding power while still easily serviceable if the need arises.
- Tops are supported between the leg top tubes and wood with spacers.

Leg Assembly

- Structural leg components are comprised of 1 1/4" diameter, 14-gauge steel tubing.
- Legs and stool columns are constructed of 1 1/4" diameter, 14-gauge steel tubing and braced horizontally to the stool support column on the opposite side of the table to resist bending.

Lock Rod

- Heavy duty 7/16" diameter lock rod is chrome plated to resist wear.
- Tamper resistant lock nuts on all down lock assemblies with a self-adjusting hinge lock ensure that the down lock engages every time.

Storage Lock

- Heavy duty storage lock is comprised of a 1 1/4" square tube with heavy-duty catch. Locks automatically in storage position and easily release from either side of the table when opening.

Table Top & Seats

Core

- Available in MDF, Particleboard, or Plywood.
- Tops and benches are surfaced with high pressure laminate bonded to a 3/4" thick AC grade core, sealed underneath with a poly backer for T-molded tabletops and a phenolic backer sheet for tabletops with Protect Edge. This is especially helpful when cleaning the underside of the table.

Edge (for table tops and benches)

- Available with Protect Edge, Vinyl T-Molding or 3MM PVC Edge Banding.
- Protect Edge is sealed with a polyurethane epoxy resin, chemically bound to the edge of the laminate, core and phenolic backing sheet.
- Vinyl T-molding is secured by staples to the top's underside approximately every 10".
- 3MM PVC Edge Banding: Heat-applied with EVA adhesive to create a strong, durable, liquid-tight seal between the tabletop and edge. The adhesive withstands temperatures up to 170°F.

Seat

Stools

- Stools are injection molded with a minimum of 25 oz. of UV additive, rubber-modified, high impact polystyrene materials measuring 13" in diameter.
- Ribs, which extend from the outer perimeter of the stool to the mounting hub in the center, are reinforced to resist failure with 12 integrally molded, tapered ribs.

- **Wobble-free** stools are mounted quickly without "wobble" with our custom designed serrated head nut and bolt. Nut also has nylon locking inserts to ensure stools stay tight.
- Power tools are recommended for safe and secure assembly.

Hardware

Table Top Screws

- Serrated head and thick threading provides superior holding power to frame with the ability to be serviced easily in the field.
- Tamper resistant.

Flower Glides and Tube Closures

- Made from glass-infused nylon and spring steel, will not break or fall out.

Casters

- 4" heavy-duty, double ball-bearing casters.
- Weight capacity of 275 lbs. per caster.
- Polyurethane, non-marring wheels.

Operation

Entrances (for bench units)

- Each bench is designed for easy entry on both ends.

Locking - Opening

- A gravity lock automatically locks the table in the open position. The lock is disengaged manually, capable of being operated from both sides of the table.

Locking - Folding

- The storage lock latch automatically locks the table in the folded storage position. The lock is disengaged manually, capable of being operated from both sides of the table and within easy reach.

Custom Torsion Bar System

- Easy opening and closing via a perfectly balanced torsion bar system.
- Each unit includes 1 to 5 torsion bars determined by table size and core material.
- Each torsion bar is at a specific angle based on weight distribution.

Safety

Lift-Off Casters

- Mobile tables incorporate the beneficial caster lift-off design in which casters lift off the floor in the open position.
- Lift-off casters do not protrude past the seats so they are not a tripping hazard.

Midway Position Lock

- Secures the unit in a partially folded position for ease of movement during floor cleaning and to prevent finger or hand pinching.

Storage Lock Latch

- Vertical adjustment ensures that the table always locks safely into the folded position.
- **UL CERTIFIED:** Tested for 7,000 open/close cycles exceeding the UL testing standard of 6,000 cycles.
- **SAFETY POSITION:** Folds in teepee position to prevent tipping.

Booth Seating

*Transforming cafeterias into cafes.
Roll and swivel into booth seating.*

Choral Risers

Redefining *Multi-Purpose* Storage and Transport

Precision Engineering, Superior Functionality

Adjustable Thermoplastic Grip Handle

Featuring a height-adjustable thermoplastic coated handle for a secure hold and comfortable maneuvering.

Support Posts for Secure Transport

Featuring 2 removable support posts, that secure tables at various points, ensuring stable and safe transportation for all table sizes and shapes.

Dual Handle Posts

Two tubular handles: one at the front with a thermoplastic grip for comfort pushing, and another at the rear for easy assistance with pulling.

Super-Duty Construction

Built from 14-gauge black powder-coated tubular steel.

Adjustable Angle Supports

Customize angle for secure and versatile storage and transportation for different width products.

Super-Duty Caster System

Equipped with super duty 5" casters: 2 swivel/locking casters at the front, 2 swivel casters in the middle, and 2 fixed casters at the rear for smooth maneuverability and secure positioning.

Extendable Design

Adjustable to three load lengths - 60", 72", and 96" - to accommodate various sizes of tables and stages.

Experience the ease and convenience of moving with the **Ultimate Multi-Purpose Transportation Dolly** – your go-to solution for all heavy-duty storage and transport needs!

Compatible Product Series

All Rectangular Tables, Stages, and Risers

Designed for narrow doorways! Our angle supports enable double stacks of 18" seminar tables to fit through a 32" wide doorway!

Features

6 super-duty 5" hard rubber casters, 2 Fixed, 2 Swivel, and 2 Swivel/Locking

Crafted from durable 14-gauge tubular steel and sheet metal with a sleek textured black powdercoating

Customize the angle supports for secure and versatile storage and transportation of difference width products.

Easily adjusts to handle 60-inch, 72-inch, or 96-inch long tables and stages

Thermoplastic-coated handle offers three height settings for added comfort

Fully Welded Hawk Connection support bracket

Easily lock/unlock with a single downward motion, protecting your shoes from scuffs

Super-duty telescoping frame mechanism

Angle Support Configuration

To load 18" wide items (For 32" doorway)

Set the Angle Supports to Hole "1"

To load 19" to 30" wide items (For 32" doorway)

Set the Angle Supports to the Flat Position on the Same Side as the End Axle Holes. On the Opposite Side, Set the Angle Supports to Hole "3"

To load bigger than 30" wide items

Set the Angle Supports to Flat Position

⚠ Double check all bolts to be tightened securely before use. Check all bolts periodically. Failure to completely tighten the bolts may result in tipping and possible injury!

DESIGN OPTIONS Tabletop Guide

High Pressure Laminate

CORE MATERIAL	Industrial Grade Particleboard, MDF, or Plywood
FINISH	Matte Finish, Color Options Vary Per Product
EDGE	Vinyl T-Mold, 3MM PVC Edge Banding or Protect Edge
THICKNESS	Mobile Tables: 3/4" • Cafe Tables: 1-1/4" • Heavy-Duty Standard: 3/4" • Heavy-Duty Supreme: 1-1/4" • Science HPL: 1-1/8" • Mobile Flipper Tables 1-1/4"

Chem-Res

CORE MATERIAL	Industrial Grade Particleboard with Chemical Resistant High Pressure Laminate (HPL) on Top Side, Resin Backer Sheet on Bottom Side
FINISH	Black, Matte Finish
EDGE	3MM PVC Edge Banding bonded with heated adhesive
THICKNESS	1"

Phenolic

CORE MATERIAL	Solid Phenolic Resin
FINISH	Black, Matte Finish
EDGE	1/8" Bevel Edge
THICKNESS	3/4"

Epoxy

CORE MATERIAL	Solid Epoxy Resin
FINISH	Black, Matte Finish
EDGE	1/8" Bevel Edge
THICKNESS	1"

Trespa

CORE MATERIAL	Cellulose
FINISH	Black, Matte Finish
EDGE	1/8" Bevel Edge
THICKNESS	3/4"

Whiteboard

CORE MATERIAL	Industrial Grade Particleboard with High-Pressure Laminate (HPL) Top
FINISH	Whiteboard Surface
EDGE	3MM PVC Edge Banding
THICKNESS	1.25"

Butcherblock

CORE MATERIAL	Solid Hard Maple Edge Grain Top
FINISH	Proprietary Urethane-Based Satin Finish or Natural Penetrating Oil Finish. <i>See Page 181 for Details</i>
EDGE	Long Edge Beveled • Square Ends
THICKNESS	1.75"

MAINTENANCE INSTRUCTIONS: Clean butcher block surfaces with soapy water or common kitchen counter top cleaners. Do not use abrasives or powder cleansers. Do not allow moisture to stand on the surface for prolonged periods of time.

Butcherblock Finishing Options & Stainless Steel Tops Sepcs

Stainless Steel Tabletop Edge Styles

SURFACE SPECIFICATIONS

- Heavy-Duty 16GA Thickness
- Grade 304: High Nickel Content Type 300 Stainless Steel, #4 Polish
- 1/4" Radius on All Top Edges & Vertical Corners
- 1-3/8" Thick Particle Board Underlayment with Melamine Backing

MAINTENANCE

CLEANING INSTRUCTIONS

Use the proper tools, clean water, and non-chloride cleaning solutions to clean dirty stainless steel surfaces. Avoid letting liquids, food particles, dirt, or any other debris sit on the stainless steel for extended periods. Refrain from using chlorine bleach, but if it is used, rinse thoroughly with water right away and dry the surface with a soft, clean towel. Always clean and wipe along the direction of the stainless steel's polish lines.

RESTORING & POLISHING YOUR STAINLESS STEEL TABLETOP

It is recommended to use a stainless steel cleaner specifically designed to polish and restore stainless steel surfaces. Choose a natural, food-safe formula that is suitable for all stainless steel surfaces used in food preparation.

Always clean and wipe in the direction of the polish lines to maintain its smooth finish and prevent scratches.

WARNING

Stainless steel resists corrosion due to a thin, invisible film created by its 12%-30% chromium content. However, if this film is damaged or scratched, the steel can corrode. Factors like chlorides in cleaners, water, food particles, and salt can weaken the film. Proper maintenance and cleaning are essential to preserve the film and ensure the equipment's durability.

Butcherblock Finishing Options

STANDARD

Urethane-Based Satin Finish

Code: BB

CORE MATERIAL	Solid Hard Maple Edge Grain Top
FINISH	Proprietary Urethane-Based Satin Finish
EDGE	Long Edge Beveled • Square Ends
THICKNESS	1.75"
FOOD SAFE	Yes

MAINTENANCE Recommended to re-finish every 2-3 weeks depending on usage.

Refinishing can be done fairly quickly using a rag and **Emmet's Good Stuff Gel Urethane**

CUSTOM

Upcharge and Extended Lead Time apply

Varnique Semi-Gloss Finish

Code: BV

CORE MATERIAL	Solid Hard Maple Edge Grain Top
FINISH	Natural Penetrating Oil Finish
EDGE	Long Edge Beveled • Square Ends
THICKNESS	1.75"
FOOD SAFE	Yes

MAINTENANCE Recommended to re-finish every 3-4 weeks depending on usage.

Refinishing can be done fairly quickly using a rag and **Boos® EZ-DO Finish**

Limited Warranty: Since Natural Wood Products rely heavily on the care they receive, Butcherblock Tabletops have One Year Warranty. The rest of the parts of the product still carry a Ten Year Warranty.

Protecting the environment is one of the most important factors affecting the future of the planet. Most people are now aware of the necessity of preserving and protecting nature in order to ensure our well-being and that of our children. Pollution, especially that related to the over-consumption of raw materials, has reached alarming levels due to our current lifestyle. That is why at National Public Seating® we are constantly striving to minimize the consequences of our activities.

At National Public Seating®, the quality of our products and the protection of the environment go hand in hand. As a consumer of raw material, we are committed to the use of pre and post consumer waste (recycled material), while preserving the high quality standards of our products.

ENVIRONMENTAL STATEMENT

EXAMPLES OF THIS INCLUDE:

- **STEEL** - All of the steel for our products contain 30-40% of post-consumer waste (recycled).
- **CORRUGATED CONTAINERS** - Are made of recycled fiber. 100% total recycled content and 90% post consumer content minimum.
- **PLASTIC** - Our plastic products contain up to 35% of pre-consumer waste.
- **WOOD** - 100% of wood used for our products comes from non-boreal forests.
- **POWDER COATING VS. LIQUID FINISHES** - Our products are powder coated and are highly protective to our environment. While liquid finishes contain solvents which have pollutants known as volatile organic compounds (VOCs), powder coating contains no solvents and releases negligible amounts, if any, of VOCs into the atmosphere. In addition, most powder coating overspray that does not adhere to the part is retrieved and reused, virtually eliminating the waste commonly found in liquid finishing processes.
- **ENERGY** - During November 2008, National Public Seating®, completed a retrofit of all its lighting (over 800 fixtures), to eco-friendly units, saving 135,586 kWh annually. This reduction in energy consumption has an environmental impact equivalent to removing 20 cars from the road, 84 tons of greenhouse gas (CO2) and saving 198 barrels of oil annually!
- **AIR EMISSIONS** - Our Folding Chairs are manufactured within ANSI BIFMA X7.1 2007 VOC Air Emission guidelines; Criteria #1 - TVOC, Formaldehyde, All Aldehydes & 4-Phenylcyclohexene.
- **MAS CERTIFIED GREEN** - The entire NPS® Product Line is now MAS Certified Green™, a nationally recognized registered trademark delineating low VOC emitting products in the marketplace so that purchasers and specifiers of those products know that they can earn credits in sustainability programs like LEED, BIFMA's Level, and California CHP program.
- **SOLAR ENERGY** - As the industry leader in institutional-grade furniture, including portable folding furniture for lunch rooms, training rooms, etc., & furniture for worship halls, science labs, music programs, performing arts, cafeterias & others, NPS® continues to trailblaze in setting the standard for environmental stewardship. In addition to minimizing its eco footprint in the areas of raw material sourcing, energy consumption & air emissions, NPS® is proud to announce a major solar panel installation on the roof of its 200,000 square foot factory facility in its corporate headquarters in Clifton, NJ, completed Summer 2011. Via the installation of a 240KW solar PV system on its roof, we will offset most of the local utility's need to burn oil and gas for electrical production in the public grid and therefore reduce greenhouse gas emissions into the atmosphere. Since we will be generating 80% of the electricity that we use with this system, we have cut our carbon footprint significantly.

WARRANTY INFORMATION

National Public Seating® offers the original user a warranty against all manufacturing defects in material and workmanship from date of purchase for ten years*. If defective, NPS will, at its option, repair or replace the defective product. This warranty does not apply to damage resulting from misuse, abuse or neglect. Excessive swaying back and forth on any banquet stack chair will entirely void the warranty. Authorization for return and / or repairs is required by contacting your dealer. This warranty gives you specific rights, and you may also have other rights which vary by state.

Orders are accepted under the express agreement that under no circumstances will seller be liable for any incidental or consequential damages, or for any other loss,

damage or expense of any kind, including loss of profits, arising in connection with the order or with the use or inability to use seller's products furnished under the order. Seller's maximum liability shall not exceed and buyer's remedy is limited to either (i) repair or replacement of the defective part or product, or at seller's option (ii) return of the product and refund of the purchase price. Such remedy shall be the buyer's entire and exclusive remedy.
