CASE STUDIES

Take an in-depth look at how CPS helped transform various spaces with smart furniture solutions. See some of what we can do, and then put us to work for you!

EAST BOSTON CENTRAL CATHOLIC SCHOOL, EAST BOSTON, MA

A school library is more than just a room filled with books. It's a space where students gather to study, collaborate, read for pleasure, and explore new ideas. In today's learning environment, libraries are evolving into flexible, multi-purpose hubs that must balance quiet reading zones with areas for group work and creativity.

East Boston Central Catholic School partnered with CPS to transform its outdated library into a vibrant, functional, and future-ready learning space. Leveraging CPS's expertise in Catholic school purchasing and access to KI's innovative education furniture, the school created a library that is both inspiring and practical.

URSULINE ACADEMY, DEDHAM, MA

Ursuline Academy partnered with CPS to refresh their classrooms with modern, durable, and flexible furniture designed to support collaborative learning, individual study, and teacher instruction. CPS worked closely with — KI, MooreCo, Ghent, and Global — to deliver and install a cohesive selection of desks, seating, storage, and instructional tools tailored to the Academy's needs.

By partnering with trusted manufacturers and managing delivery and installation from start to finish, CPS ensured a smooth implementation that aligned with the Academy's vision and schedule. The result is a refreshed learning environment that supports both educators and students — providing durable, flexible spaces designed to foster focus, collaboration, and academic excellence for years to come.
