

Cybersecurity, built for today's Diocese.

towerwall

+

Religious organizations, Houses of Worship, schools and missionaries often carry a false notion that they are at least risk of cyber-attacks, because they are not involved in buying and selling of commercial goods and services. Contrary to this belief, cyber criminals have been regularly targeting churches, catholic organizations, and even the Vatican.

Time has come for religious leaders to recognize the imminent risk of cyber threats and adopt cybersecurity best practices to protect their organizations, members and the community at large. Towerwall is here to help.

**Key Security
Challenges
We Help You
Solve**

Protect Your Data from Ransomware

We help Catholic Diocese develop robust incident response plans and work out how to respond to a ransomware attack should the worst happen.

Do More with Limited Resources

We work with you to understand your resources and your budget limitations. From technology utilization to developing scalable security programs, we help you stay secure with less.

Navigate & Meet Compliance Requirements

Compliance requirements are increasingly focused on employee training. We can help build a program that can help you meet compliance mandates.

Protect Public Image & Credibility

A security breach can lead to substantial costs like fines, legal fees, settlements, loss of brand reputation and public trust. We can create and maintain a policy that can help avoid such negative consequences.

Leverage your Investment in Technology

We conduct a thorough evaluation of People, Processes, and Technology. This ensures the effectiveness and utilization of cybersecurity tools and your investment in technology.

Stay Secure in the Cloud

Organizations that move to the cloud have to assume new responsibilities, develop new skill sets and implement new processes. Our cloud experts help you build secure cloud environments.

Select Organizations We Have Helped Protect

To discuss your cybersecurity needs, contact us at 774.204.0700 or info@towerwall.com

Our Cybersecurity Solutions

Built to Protect You Across All Challenges

Risk Assessments & Compliance

We help you assess your risks, pinpoint security gaps, and create compliance pathways to ensure you meet necessary requirements.

Program & Policy Development

We develop security programs and policies that are easy to deploy and can grow with your needs over time.

Penetration Testing Experts

Our 25+ year experts test your defenses to make sure you are secure and the bad guys stay out.

Technology Consulting Experts

We help you select and deploy technology to stay secure across the diocese & endpoints.

Secure Development Lifecycle

We help you integrate security best practices into every phase of the software development process.

Vendor Risk Management

We help you assess, monitor, and mitigate risks associated with third-party vendors, making sure they do not lead to a breach.

Comprehensive Security Training

We develop programs and training for your people to help them become more cyber-secure.

Cybersecurity Insurance

We help you select and prepare for the right insurance policy that keeps you protected.

Taking the First Step in Cybersecurity: Risk Assessments

Unsure where to begin with cybersecurity? At Towerwall, we make it simple by starting with a comprehensive Risk Assessment.

Tailored to your compliance and security needs, our assessments dig deep to uncover vulnerabilities, identify gaps in your current security posture, and develop a strategic plan to keep your organization protected long-term.

Watch our CEO, Michelle Drolet explain how Towerwall helps organizations take their first step.
